Procedure reg.submission of proposals under --

...

CIRCULAR OF GOVERNMENT : Paragraph 33(4) of the Manual of Land Acquisition provides that in all cases in which land is to be acquired for any Deptt.for works carried out by B.and C.Deptt.agency, the Executive Engineer should apply to Collector through the Supdt.Engineer, and the Collector should forward the application through the Commissioner to Govt.in the Revenue department through the Building and Communications Deptt. In the past the occasions for acquisition of private land of extensive nature were comparatively fewer and it did not therefore matter if the proposals for acquisition were routed by the Executive Engineer through their respective Supdt.Engineers. However, in the present context of tempo of works on big irrigations schemes, road and building projects included in the development activities of the State, extensive lands are under acquisition and it is considered essential to cut down delays in the transmission of proposals through several officers.

2. Govt.has carefully considered this question & is pleased to direct that when requisite certificates such as availability of funds etc.are furnished by the Ex. Engineer, Collectors should accept such proposals for land acquisition directly from the Executive Engineers. However, in the case of works for which lump sum provisions are placed at the disposal of Supdt.Engineers in the Annual or Supplementary budget estimates, the present practice of routing the land acquisition proposals by Executive Engineers through the Supdt.Engineers should continue.

3. Paragraph 33(4) of the Manual Land Acquisition should accordingly be amended as follows:-

"In all cases in which land is to be acquired for any Deptt.for works carried out by Bldg. & Communications Deptt.agency or by Irrigation and Power Deptt. the Executive Engineer should send the application to the Collector with the requisite certificate regarding availability of funds and the Collector should forward it to the Commissioner with his report thereon. However, in the case of works for which lump sum provisions are placed at the disposal of Superintending Engineers in the Annual or Supplementary budget estimates, the Executive Engineers should submit such proposals to the Collector through the Superintending Engineers."

4. The Settlement Commissioner & Director of Land Records should issue necessary correction slip to the Manual of Land Acquisition.

By order and etc.
