

No SV-751 of 1940
Poona, 11th September 1940

CIRCULAR

The note below para 153 of the City survey Manual requires the Maintenance Surveyor to correct the City Survey records and then to communicate the change to the District Survey Office for preparing the KJP in respect of conversions of agricultural lands to Non-agricultural uses within city survey limits

2/- The instructions contained in Senior Superintendent of Land Records Central Divisions No L.R 52 of 9th June 1933 require the Maintenance Surveyor to send the case papers to the District Survey Office but they do not say anything about the correction of City Survey records. Consequently in some City Surveys the records are not corrected till the receipt of the KJP. In order to stop this anomaly it is hereby ordered that the Maintenance surveyor should correct the City Survey records as soon as he received the Collector's sanction for the N.A. use, and then forward the papers to the District Survey Office for taking steps to prepare the KJP

Sd/-xxx
Settlement Commissioner and
Director of Land Records
