

Land Acquisition

For works carried out by
Buildings and Communications
Department agency.
Procedure regarding submission of
proposals under -

Government of Maharashtra,
Revenue Department.
Circular No. LQN. 5563-H,
Sachivalaya, Bombay, 3rd Sept. 1963.

:CIRCULAR OF GOVERNMENT:

Paragraph 33(4) of the Manual of Land Acquisition provides that in all cases in which land is to be acquired for any Department for works carried out by Buildings and Communications Department agency, the Executive Engineer should apply to Collector through the Superintending Engineer, and the Collector should forward the application through the Commissioner to Government in the Revenue Department through the Buildings and Communications Department. In the past the occasions for acquisition of private land of extensive nature were comparatively fewer and it did not therefore matter if the proposals for acquisition were routed by the Executive Engineer through their respective Superintending Engineers. However, in the present context of tempo of works on big irrigation schemes, road and buildings projects included in the developmental activities of the State, extensive lands are under acquisition and it is considered essential to cut down delays in the transmission of proposals through several officers.

2. Government has carefully considered this question and is pleased to direct that when requisite certificates such as availability of funds etc. are furnished by the Executive Engineer, Collectors should accept such proposals for land acquisition directly from the Ex-Engineers without passing them through the Superintending Engineers. However, in the case of works for which lump sum provisions are placed at the disposal of Superintending Engineers in the Annual of Supplementary budget estimates, the present practice of routing the land acquisition proposals by Executive Engineers through the Superintending Engineers should continue.

P.....2...

3. Paragraph 33(4) of the Manual Land Acquisition should accordingly be amended as follows:-

"In all cases in which land is to be acquired for any department for works carried out by Buildings and Communications Department agency or by Irrigation and Power Department the Executive Engineer should send the application to the Collector with the requisite certificate regarding availability of funds and the Collector should forward it to the Commissioner with his report thereon. However, in the case of works for which lump sum provisions are placed at the disposal of Superintending Engineers in the Annual or Supplementary budget estimates, the Executive Engineers should submit such proposals to the Collector through the Superintending Engineers."

4. The Settlement Commissioner and Director of Land Records should issue necessary correction slip to the Manual of Land Acquisition.

By order and in the name of the Governor of Maharashtra.

Sd/-R.T. NADKARNI,
Assistant Secretary to Government.
