19th January 1955

Subject : Survey Correction in N.A. Cases

With a view to avoid delay in the issue to the K JPs and consequent inconvenience and/or complication in cases of agricultural lands to N.A use involving survey correction, if Revenue officers will hereafter send to the Dist. Inspector of Land Records only the Marginally noted papers (and not the whole correspondence) and the Dist Inspector of Land Records should undertake the measurement and subsequent correction work in the basis of the papers so received by them from the Revenue authorities (and not call for or insist on the supply of the whole correspondence). In case the measurement discloses any changes in the boundaries and/ or the area, or any breach of conditions such charges should be brought to the notice of the Revenue Officers by returning the case papers received by the Dist Inspector of Land Records alongwith the measurement paper and a fresh order (Permitting the N.A use) should be obtained, before proceeding with the correction of the survey records. The N.A sanads must also be modified by the Revenue Officers accordingly by adding a fresh condition, or otherwise, suitable amending the land issued in the first instance.
